

COVID-19 Update -

Our hearts are with our customers, friends and families as we work together to contain COVID-19. At McQuillan Bros, the health and safety of our customers, our team, and our community remain our top priority. Amid the growing concerns around COVID-19, we are taking additional steps to be extra vigilant.

We know that the services we provide are critical to maintaining the health and sanitation standards of our community and we take that responsibility seriously. The McQuillan Bros team remains committed to meeting the home service needs of our community.

Given the current situation, we are elevating our internal safety practices. These additional measures to minimize health risks include:

- Avoid shaking hands with our customers to limit physical contact
- Avoid contact with pets in the homes
- Extra hand washing and sanitation before and after each customer visit
- Use antibacterial and anti-microbial cleaning solutions for our hands, equipment, and our workspace.
- Wear gloves, cleaning and disinfecting frequently touched surfaces. Before and after we provide service

We also recommend customers follow guidelines issued by the CDC, which can be found at this link.
